Your school upholds Christian values — why should you expect anything less from your financial institution?

WatersEdge exists to financially empower Christian nonprofits and their donors to transform lives with the Gospel. We understand your desire to steward your resources well, to do everything you can to equip your students to lead Christ-centered lives in a world that's never needed them more.

By partnering with us, your resources will further advance your mission and make a Kingdom impact. Let us help you manage your resources wisely through asset management, cash management, financing, and donor development.

ASSET MANAGEMENT

Do you have long-term assets invested with your bank? We specialize in managing endowment assets requiring steady distributions that grow with the level of inflation. We also offer cash management options with greater access, including demand and term investments.

And, because of our biblically based social screens, your assets would not be invested in companies whose business activities are contrary to Christian values.

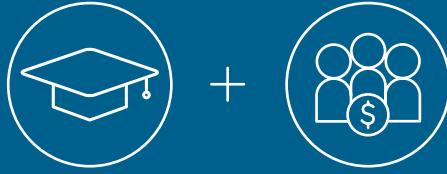

MINISTRY LOANS

Do you need financing for new projects? Our loans are cost-efficient and hassle-free, and the interest you pay goes to other ministries and individuals who've invested in Kingdom causes.

DONOR DEVELOPMENT

Do you need help promoting and administering complex, tax-advantaged gifts or estate plans? We can help you build a stable future through a suite of custom giving solutions and our online estate planning tool.

Christian Education + Christian Financial Resources

WatersEdge can grow your assets through investments, finance new projects, and handle complex or long-term gifts, all while adhering to Christian values and impacting the Kingdom. Partner with us today and see your resources transform lives with the Gospel.
